

Issue: Trees

Issue:

Woodland is home to a wealth of wildlife, from shade-loving plants and delicate fungi, nesting birds, mammals and rare insects, but they are in decline.

Facts:

Trees provide food and shelter for wildlife. In a day, a large tree can lift over 100 litres of water out of the ground and discharge it into the air.

So What?

When it comes to climate change, native woods and trees are one of the best ways to tackle the climate crisis.

Activities:

- Make some bunting entirely out of leaves.
- Create a den from sticks and branches.
- Make a nature sculpture from leaves and sticks.
- Find out about the types of trees in your area.
- Create a 'record breaking trees' poster/ booklet full of facts that your friends won't 'be-leaf'!

Other Activities:

- The Woodland Trust give away trees to schools and communities every year. Register and help British Woodland.
- The Woodland Trust have created a website full of extra activities for you and your school.
